What influences CHD Status to be High Risk ?

When...

glucose is more than 121

diaBP is more than 110.5

prevalentStroke is 1

sysBP is more than 176

age is more than 64

prevalentHyp is 1

....the likelihood of CHD Status being High Risk increases by

3.13x

3.04x

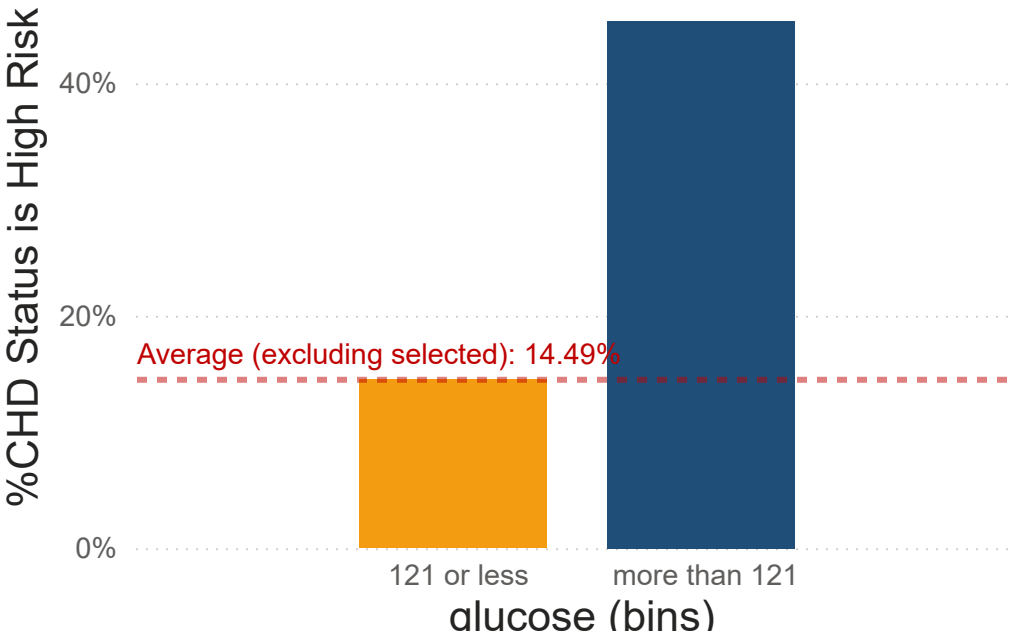

2.93x

2.88x

2.60x

2.26x

← CHD Status is more likely to be High Risk when glucose is more than 121 than otherwise (on average).
